### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a decoding circuit and decoding method of a Viterbi decoder. A search of prior art records has failed to teach a decoding method comprising; "performing a longitudinal arrangement with respect to a trellis diagram corresponding to the Viterbi decoder so as to obtain a longitudinal arrangement trellis diagram; processing the longitudinal arrangement trellis diagram according to a run length limited (RLL) code so as to obtain a RLL trellis diagram" or "performing a longitudinal arrangement with respect to the original trellis diagram so as to obtain a longitudinal arrangement trellis diagram; processing the longitudinal arrangement trellis diagram according to a RLL code so as to obtain a RLL trellis diagram" as disclosed in claims 1 and 9 respectively. Nor does the prior art teach a decoding circuit comprising; "a data string controller for receiving the decision bit outputted from the add-compare-select unit and deciding the direction of the output string of the decision bit; a trace mite-in register array for receiving the decision bit outputted from the data string controller and tracing to obtain a merged value" along with the remaining limitations of claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
